# The Problem

## Why Teams Struggle Today

Moving companies lose thousands each month on recycled leads, incomplete inventories, and price-shopping customers. Traditional lead platforms prioritize volume over quality, leaving movers to absorb the cost.

# 40%

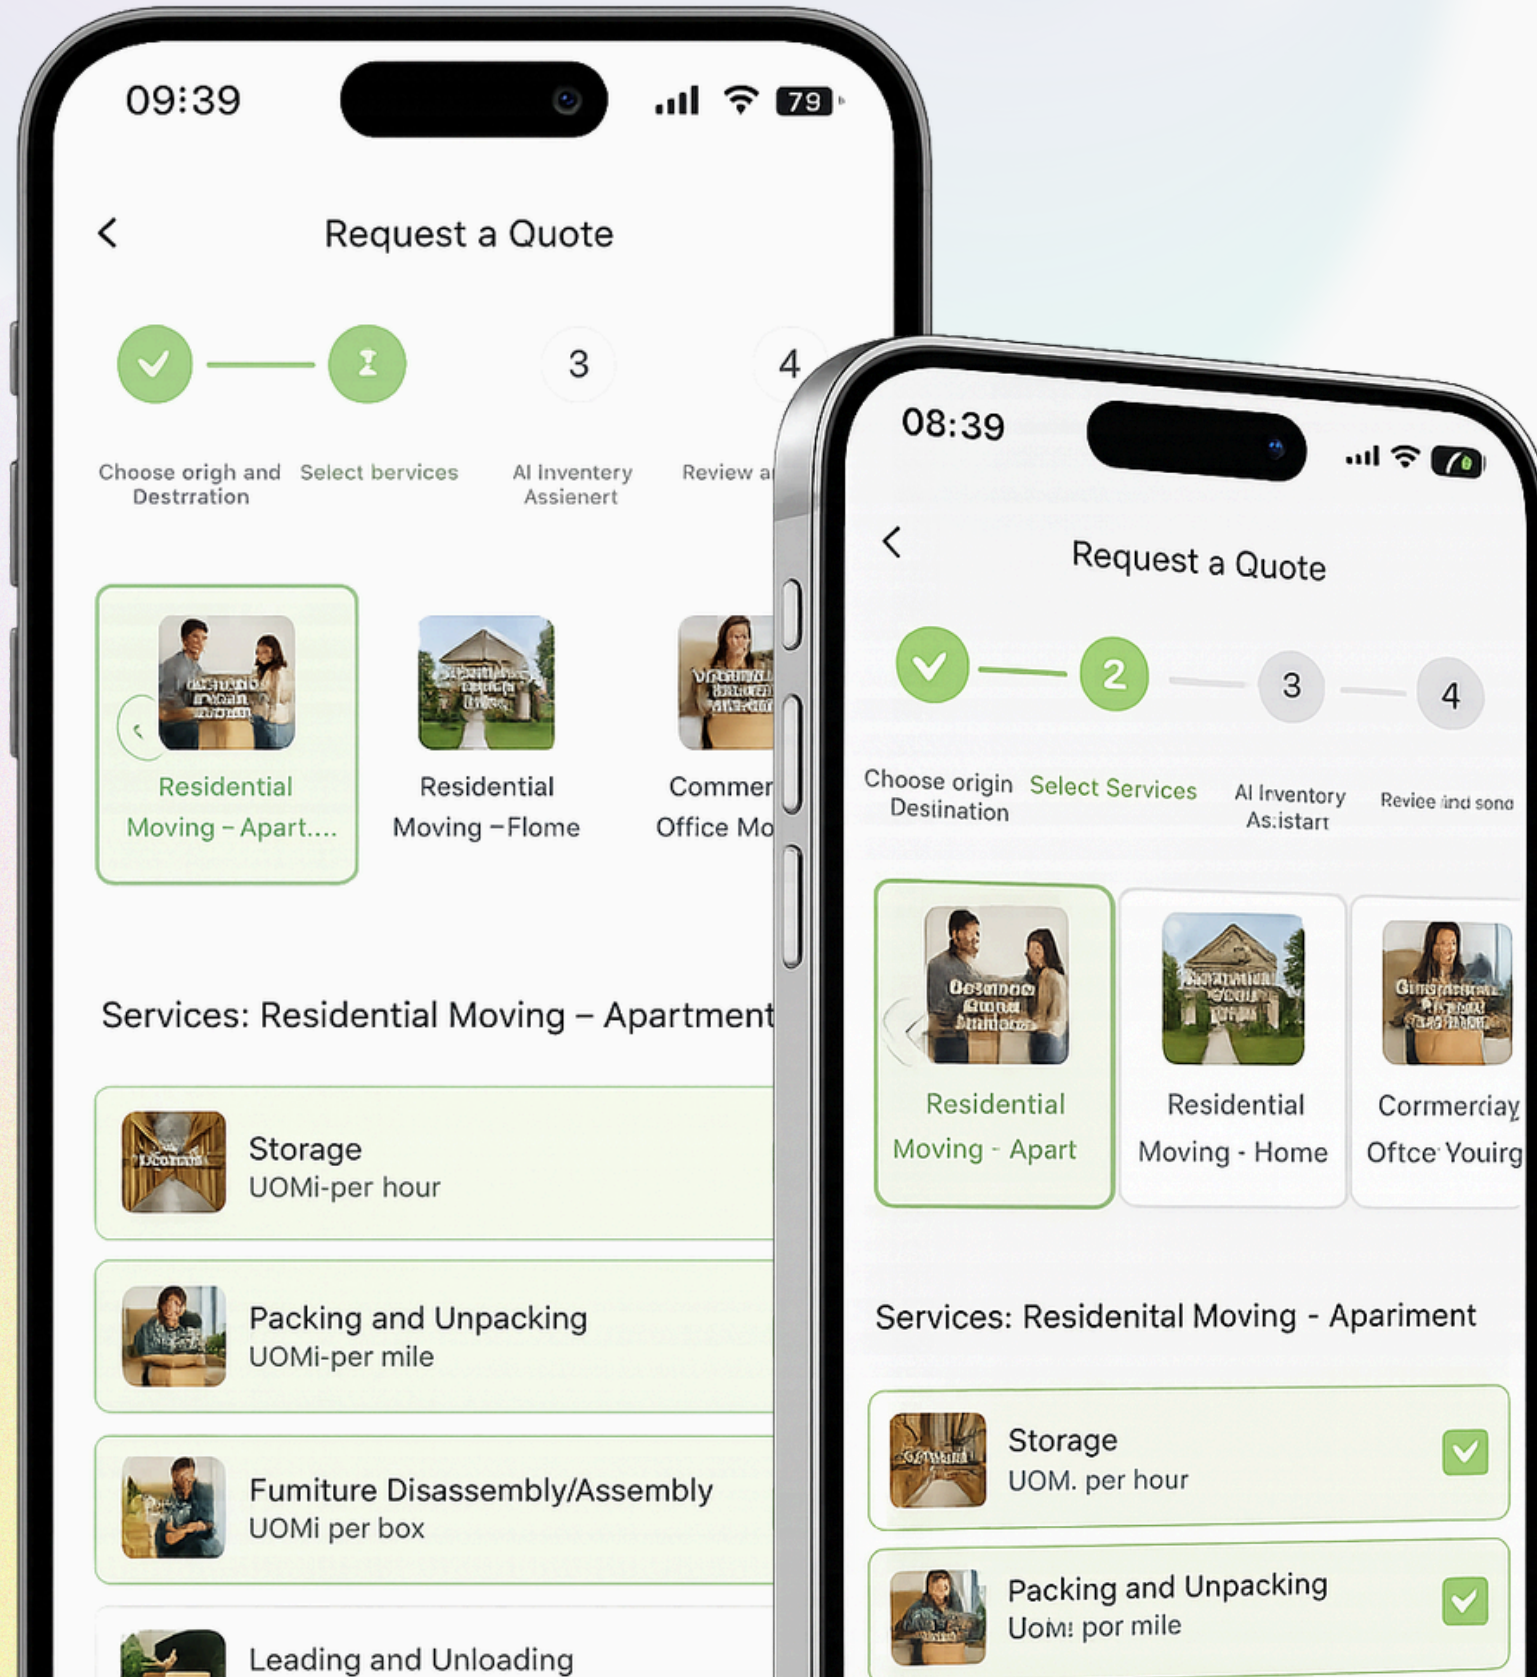

### Tool Overload

Up to 40% of leads are unreachable, incomplete, or never respond after submission

# 3-5x

### Decision Delays

The same lead is sold to 3-5 competing movers, forcing a race to the bottom on pricing

# Our Solution

GetMoved verifies every customer before a lead is delivered. Through guided video inventory capture, AI validation, and human review, movers receive qualified opportunities instead of recycled inquiries.

## Unified Workspace

Customers submit guided video walkthroughs so movers see exactly what needs to be moved before quoting.

## Real-Time Intelligence

Our system detects incomplete inventories, inconsistencies, and low-quality submissions before they reach your team.

## Scalable Growth Engine

Receive leads that are verified, purchase-ready, and never blasted to a dozen competing movers.

# How GetMoved Works

From Lead to Completed Move

## 1. Customer Creates Request

Customers fill out details and upload inventory or opt for manual selection.

## 2. Movers Receive & Submit Quotes

Qualified movers receive the request, review inventory details, and submit pricing.

## 3. Customer Accepts & Pays

The customer selects a mover, completes payment, and activates the work order automatically.

## 4. Move Completion & Fund Release

After the Bill of Lading is uploaded, the platform confirms completion and releases payment to the mover.

Feature overview

# Move configuration

## Flexible Service Selection

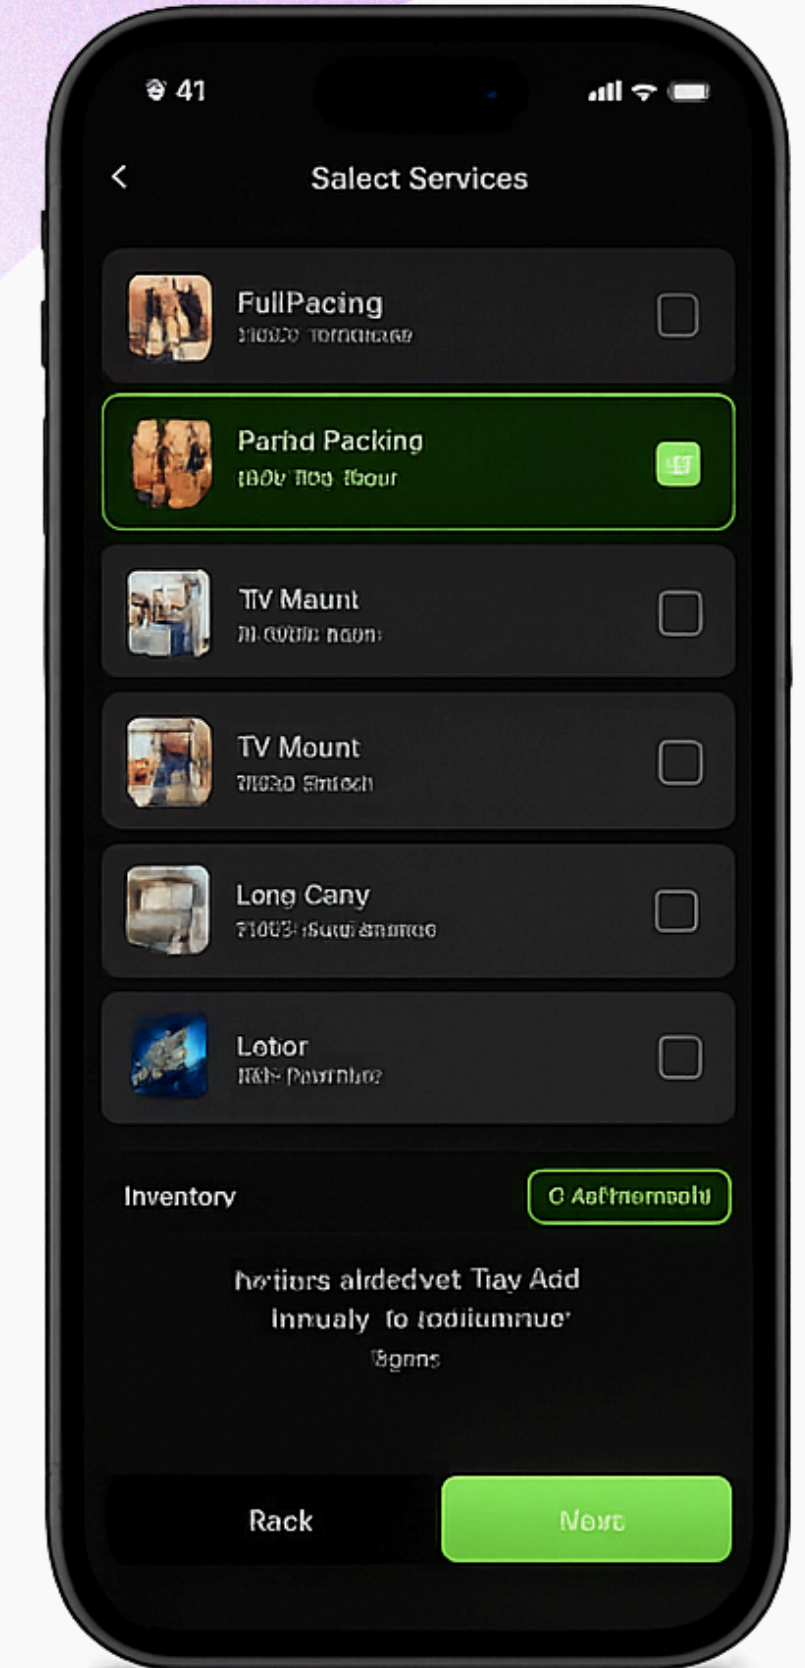

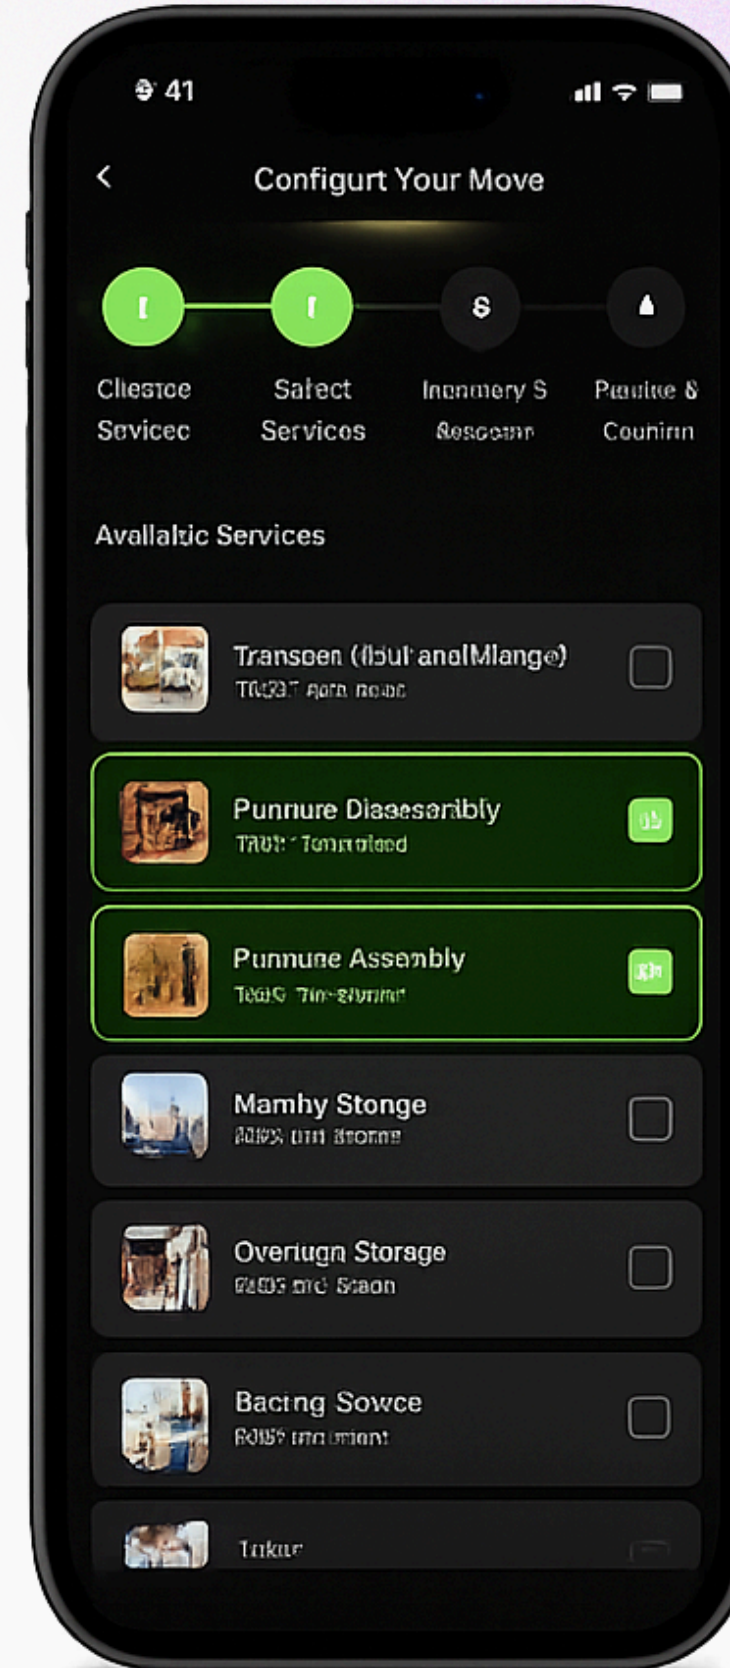

Customers choose exactly what they need – from packing to storage to specialty items.

## Real-Time Configuration

Every selection updates pricing and scheduling instantly, with no back-and-forth.

## Operational Transparency

Teams see exactly what was requested, reducing miscommunication on move day.

Feature overview

# Manual inventory

## Structured Item Catalog

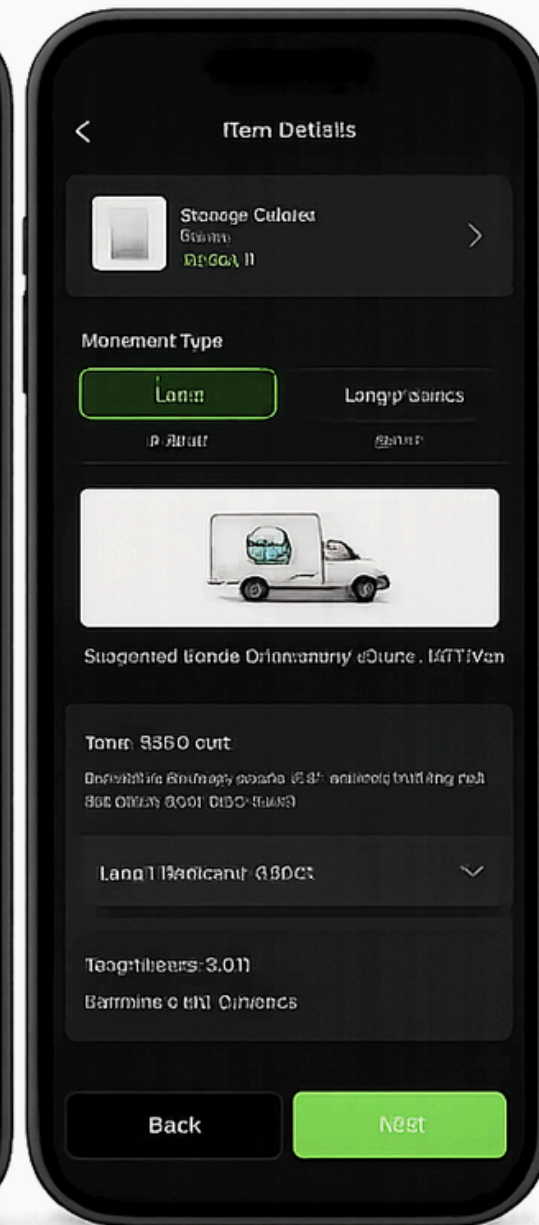

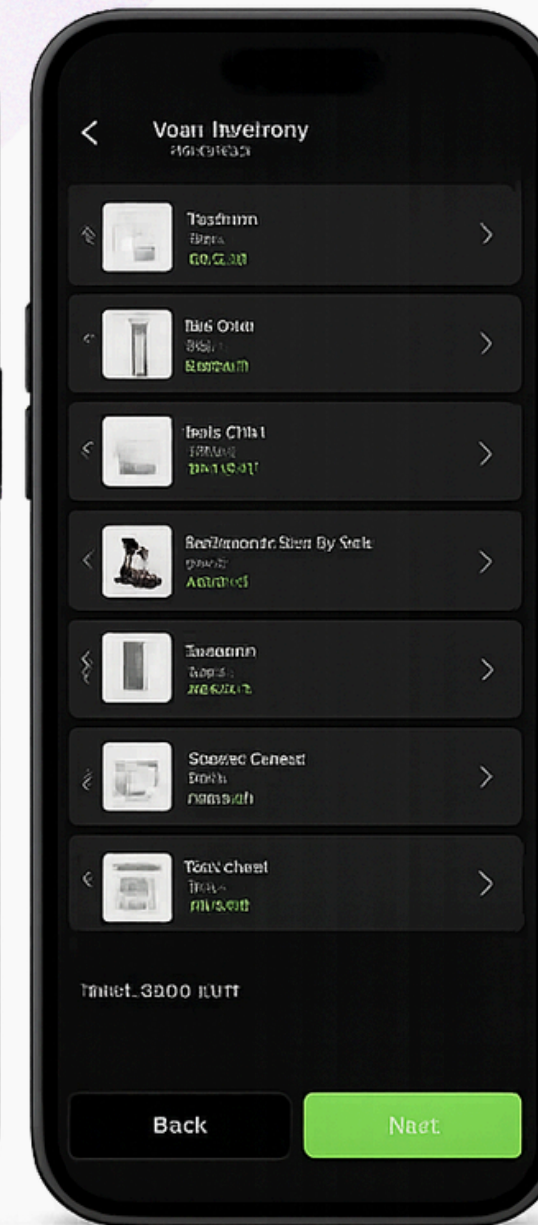

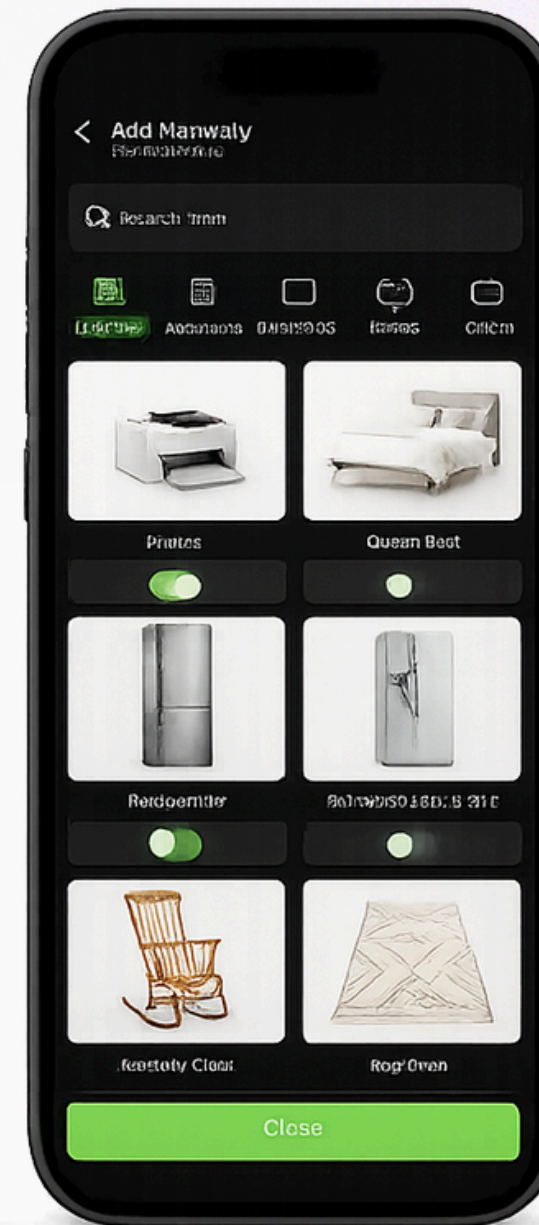

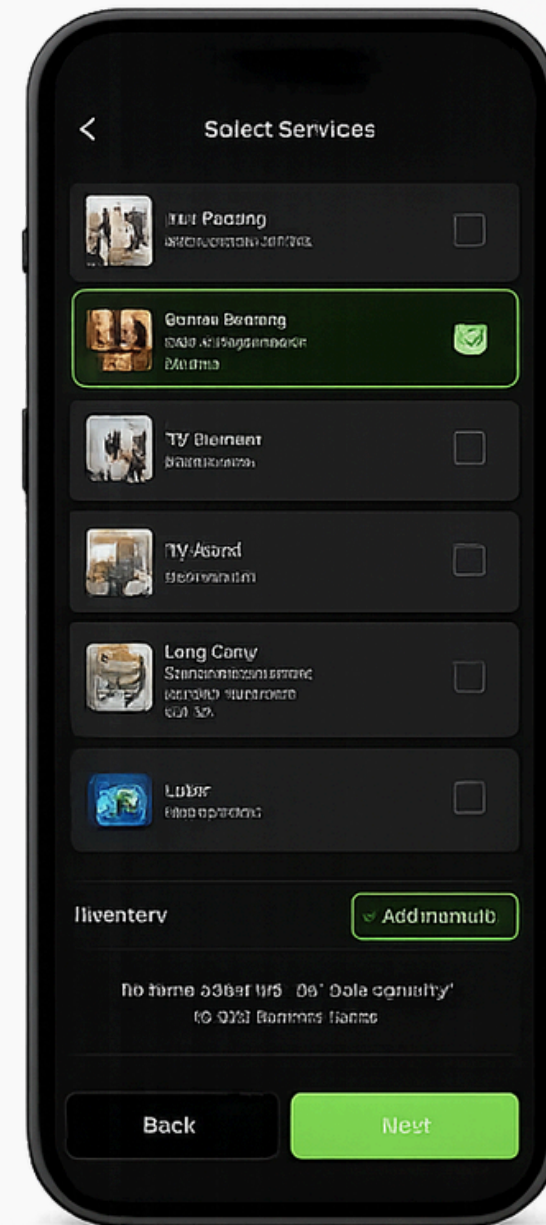

Pre-built categories and items let customers quickly find and add what they're moving.

## Real-Time Inventory Building

Each item added updates the quote in real time – no waiting, no manual calculations.

## Accurate & Efficient

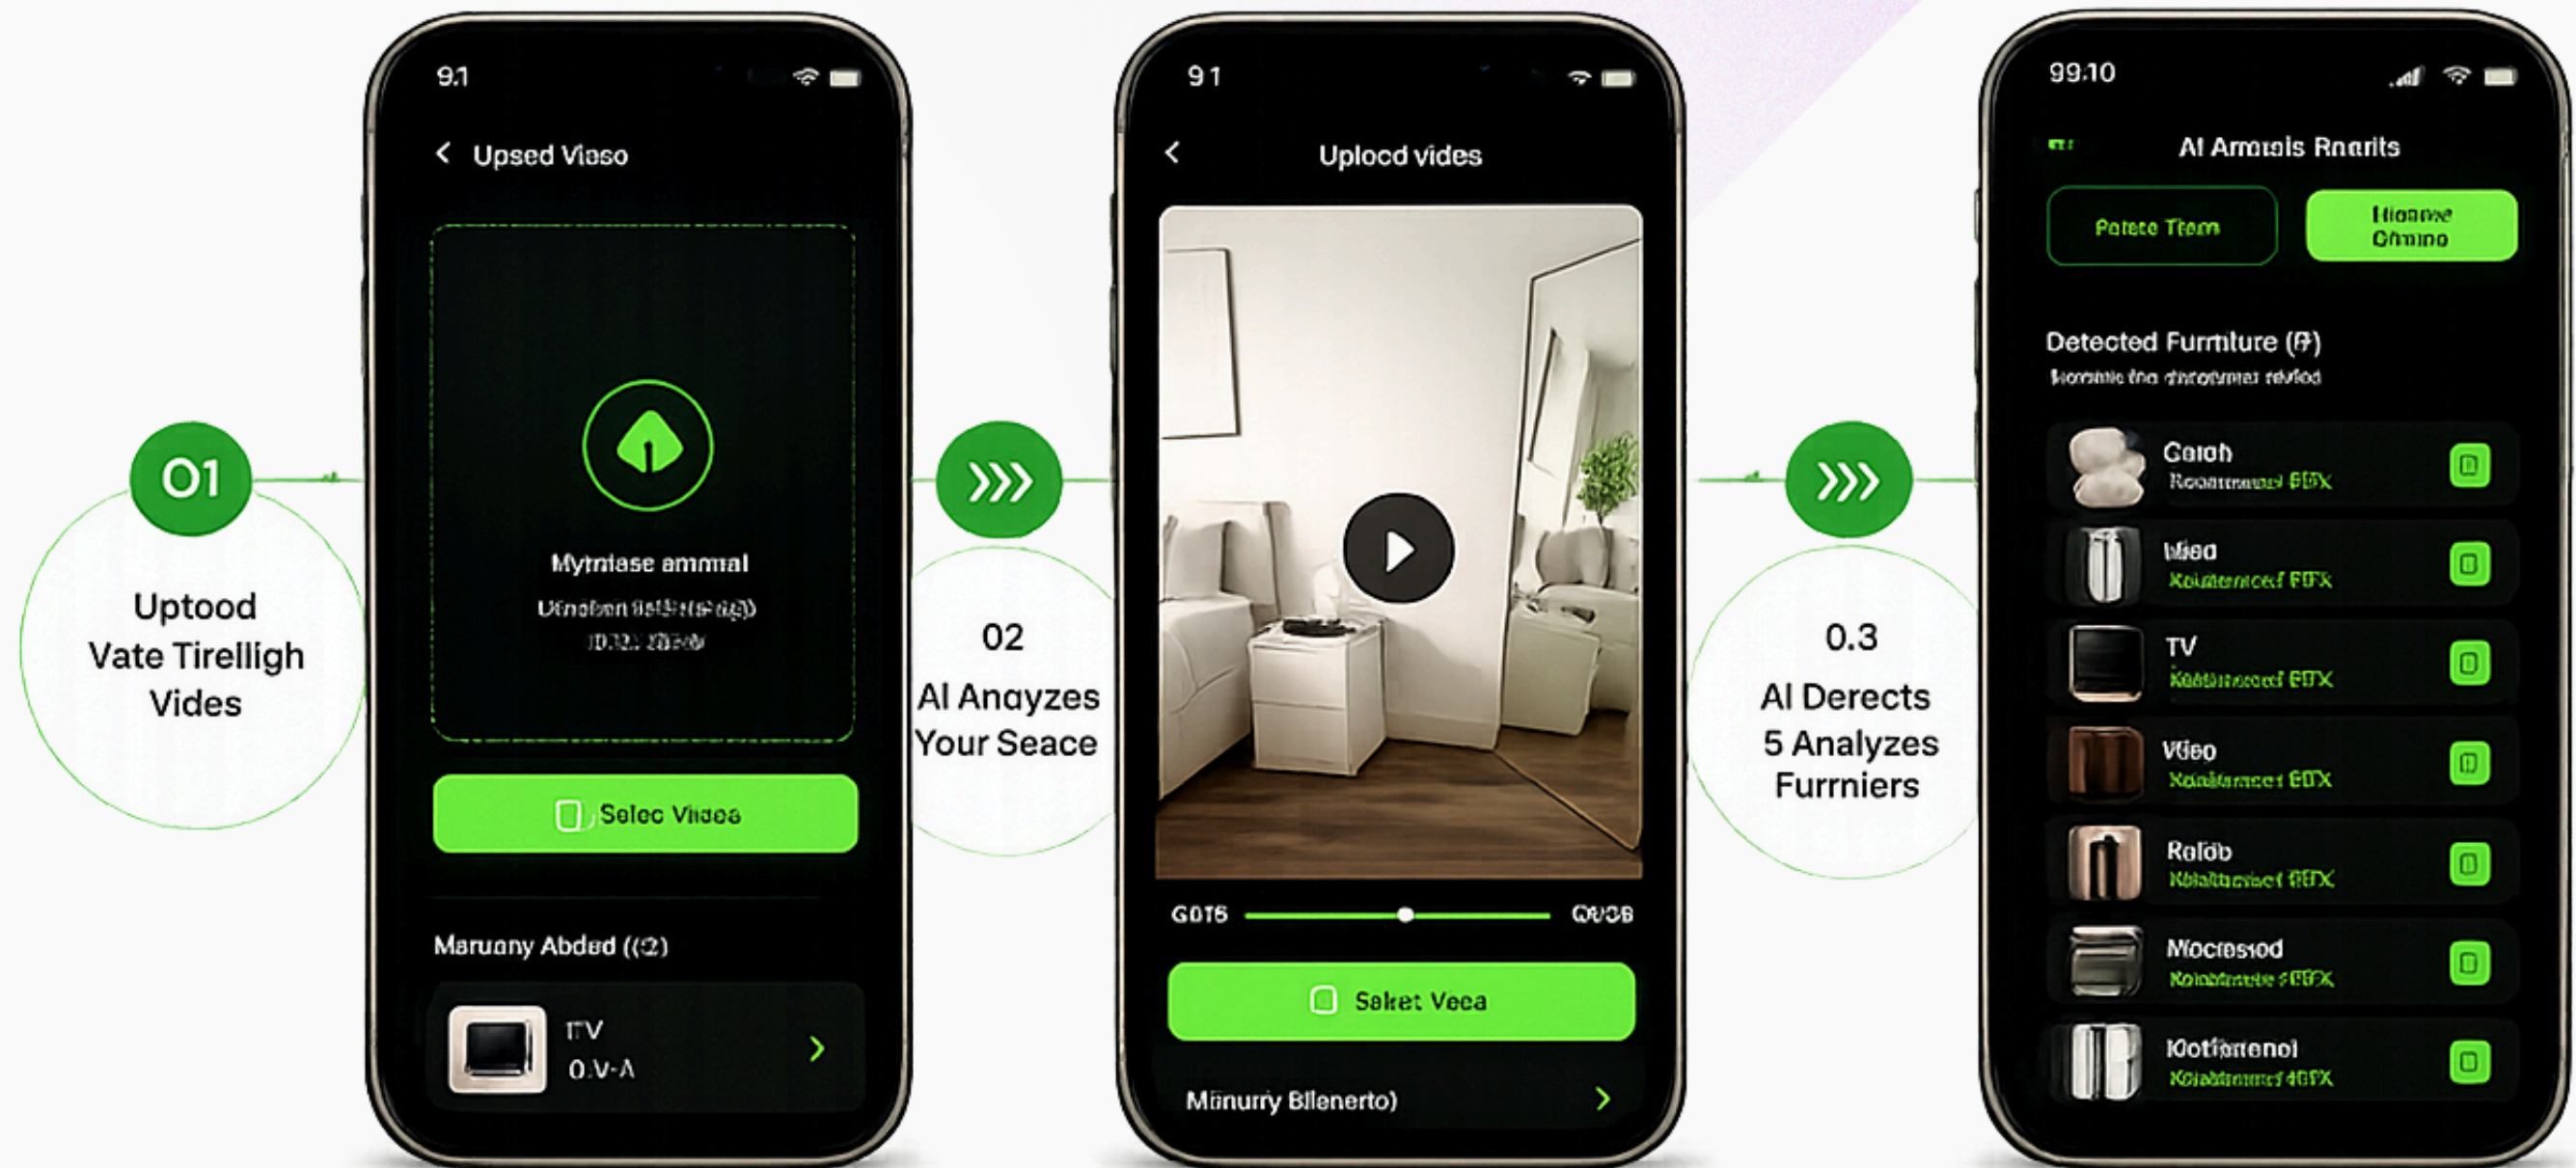

Movers get a detailed, accurate inventory list before the job even starts.

## Feature overview

# Walkthrough Video AI-Powered Detection

Customers record a quick video walkthrough of their space. Our AI analyzes the footage, automatically detects furniture and items, and builds a detailed inventory list with no manual input needed.

## Feature overview

# Review & Submit

### Complete Move Overview

Review all move details in one place.

### Services & Inventory

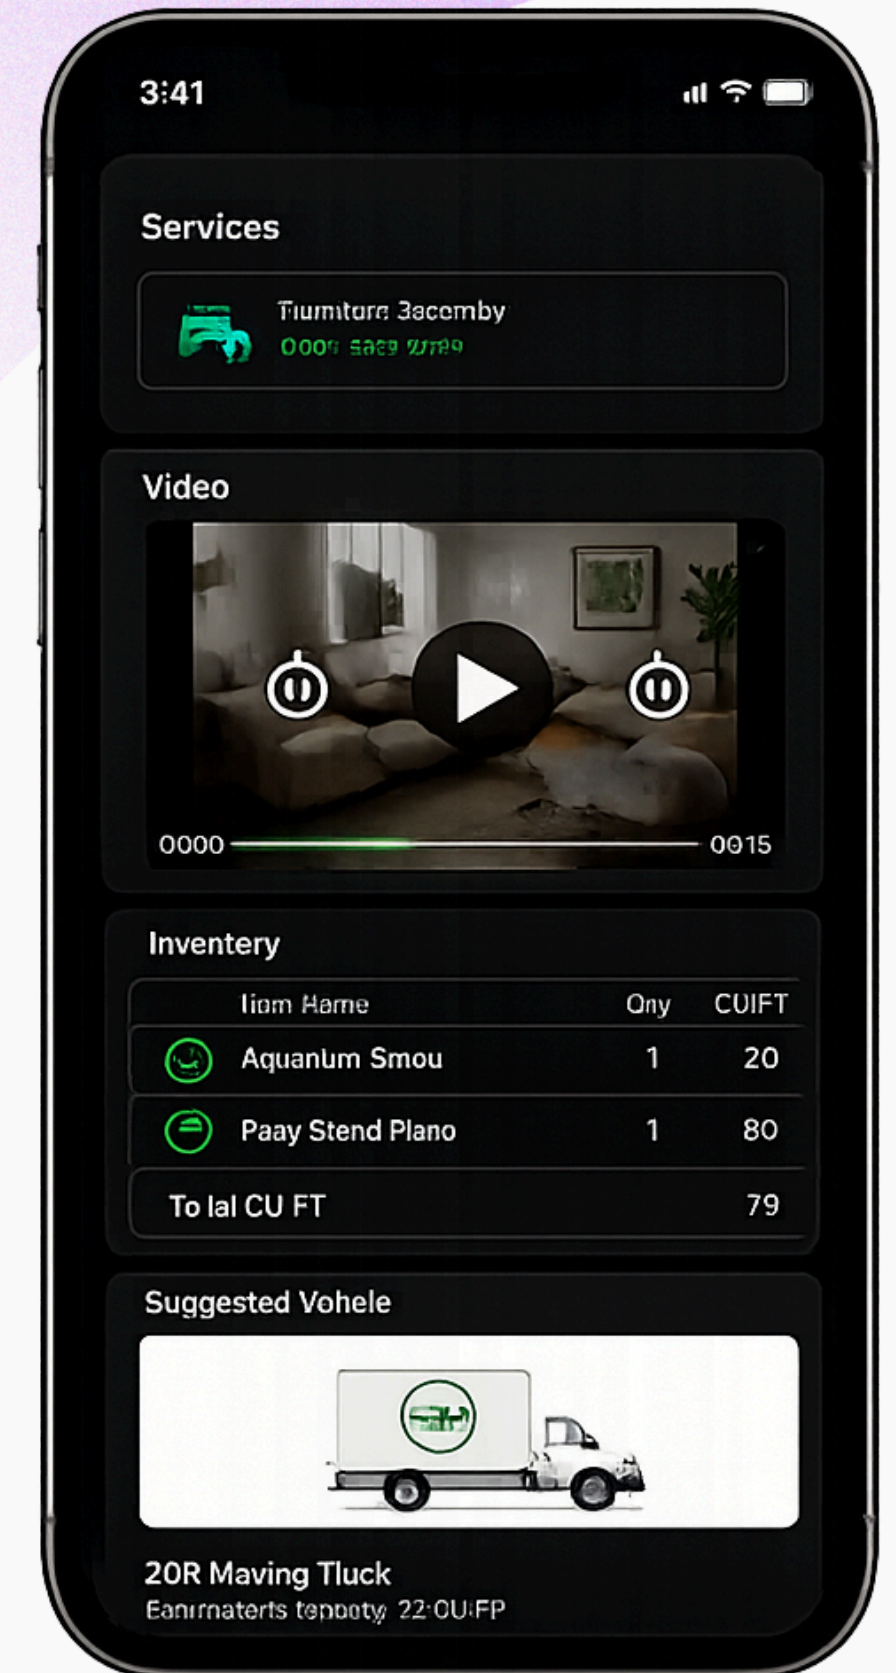

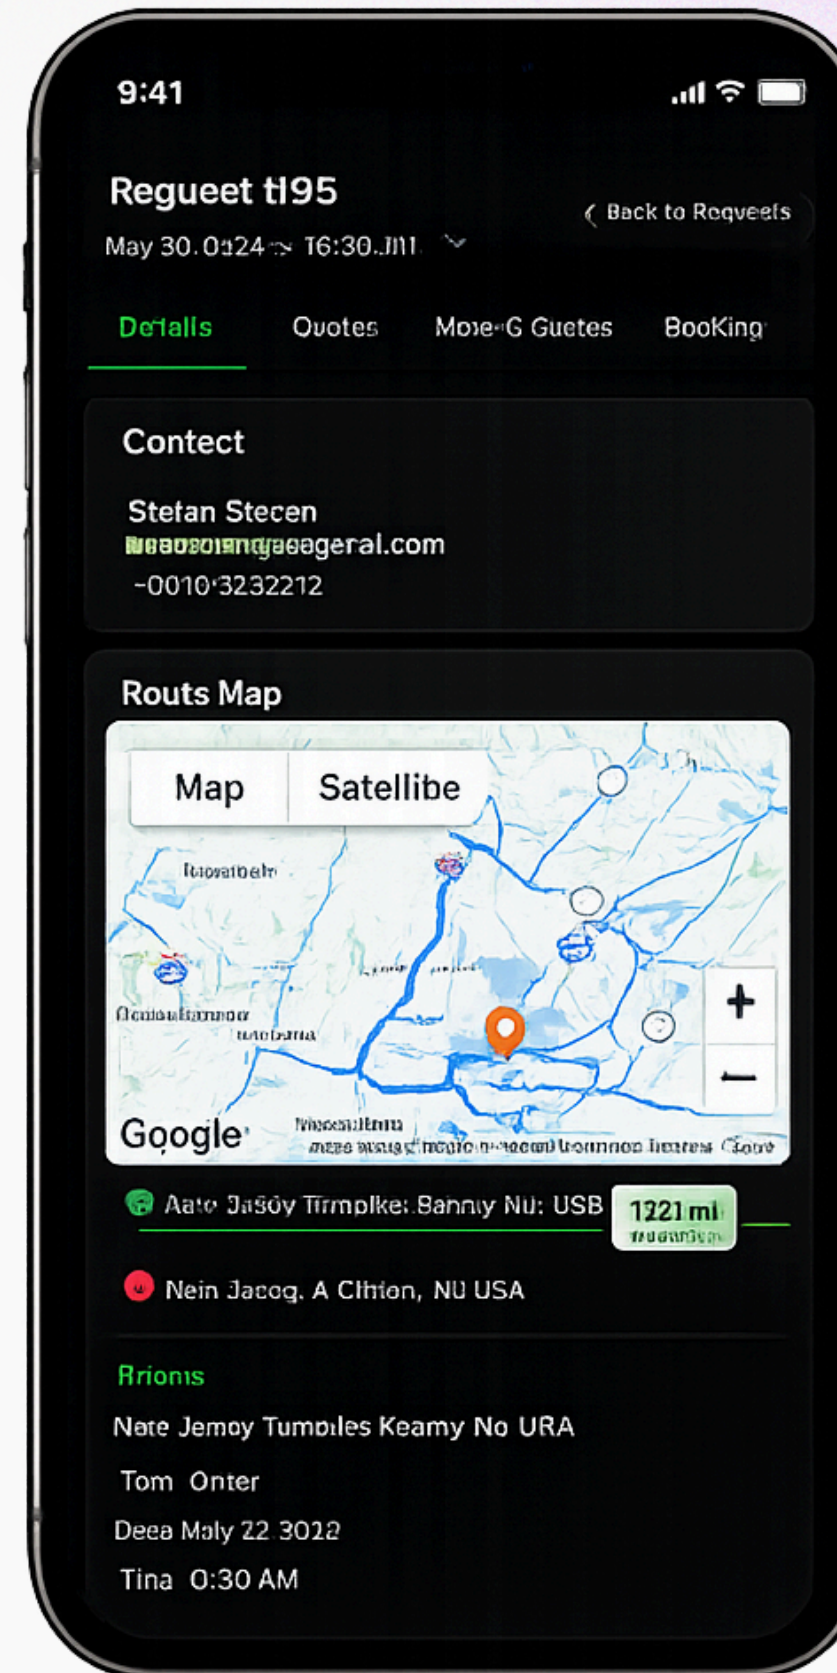

See selected services and inventory items clearly.

### Route & Map Preview

Visualize pickup and delivery locations.

### Contact Information

Verify contact details before submission.

Feature overview

## Customer quote selection

### Compare Structured Quotes

View clear, standardized quotes from verified movers.

### Verified Movers

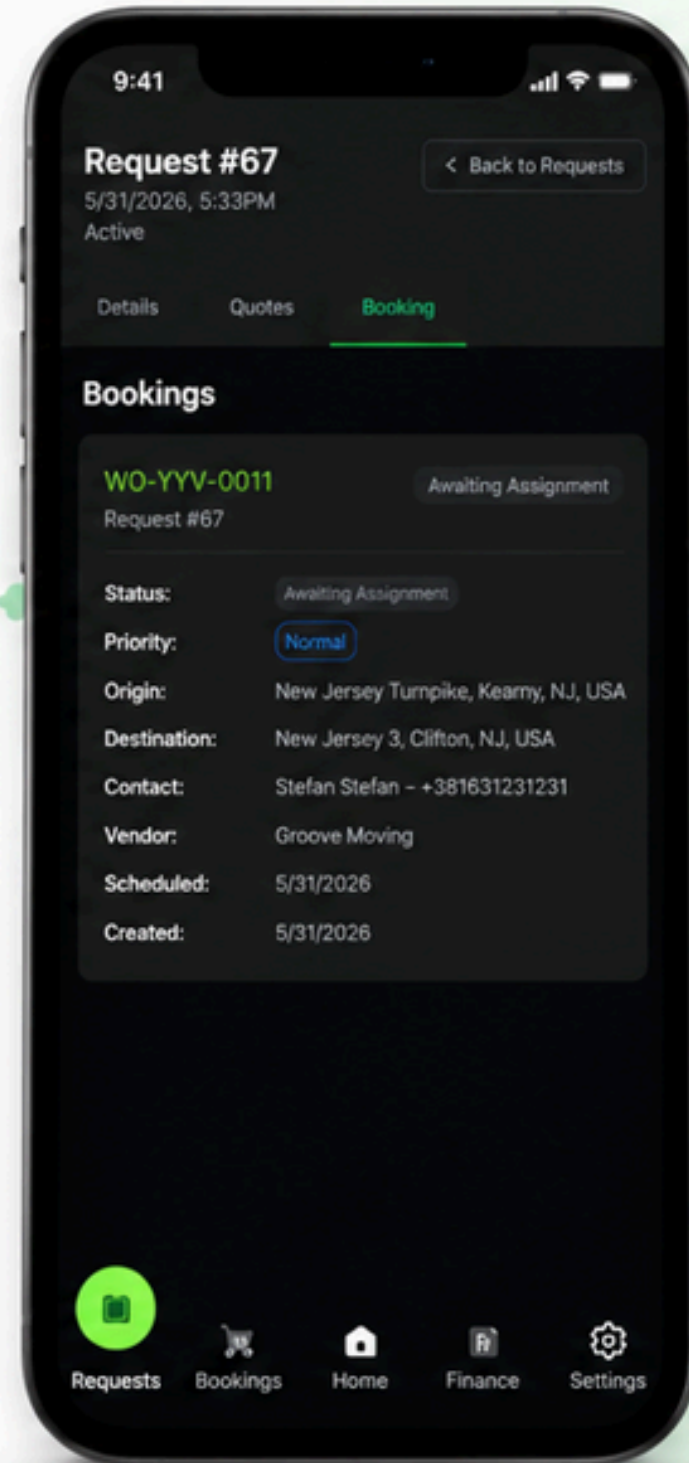

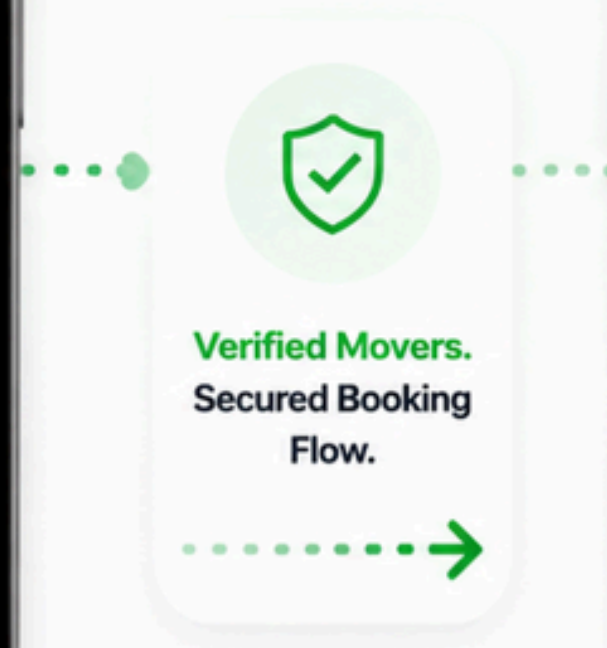

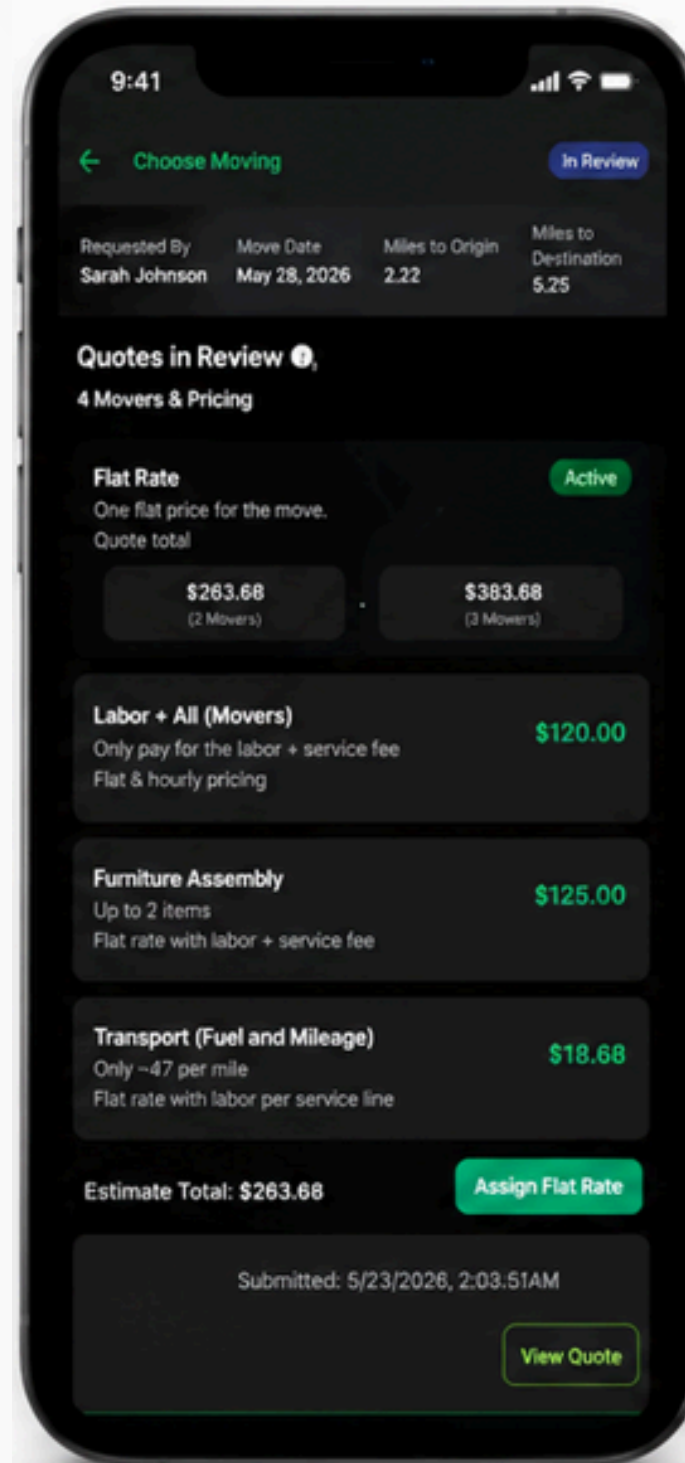

All movers are verified for quality, insurance, and reliability.

### Secure Reservation Hold

Lock in your preferred mover with a secure reservation hold.

### Seamless Booking Flow

Confirm details and finalize your booking in just a few taps.

## Feature overview

# Secure payment & completion workflow

### Upfront Payment

Customers pay securely before the move begins.

### Work Order Tracking

Real-time status updates from proposal to completion.

### Bill of Lading

Digital proof of delivery and move completion.

### Payment Release

Funds released automatically after confirmed delivery.
