The Problem

Traditional lead generation is broken for movers.

Moving companies lose thousands each month on recycled leads, incomplete inventories, and price-shopping customers.

Traditional lead platforms prioritize volume over quality, leaving movers to absorb the cost.

Lead Providers Are Costing Movers Time & Revenue

Low-Quality Leads

Up to 40% unreachable

Movers pay for inquiries that are incomplete, inaccurate, or never respond after submission.

Uniq marketplace

Bookings are guaranteed

The same lead is often sold to several moving companies, even being booked. We provide unique opportunity for movers to be selected by customers.

Wasted Estimating Time

15-30 mins lost per quote

Teams spend hours quoting jobs that never convert due to missing inventory details or unrealistic expectations.

No Accountability

Paid whether booked or not

Most providers charge upfront regardless of lead quality, booking outcome, or actual move completion.

GETMOVED.APP

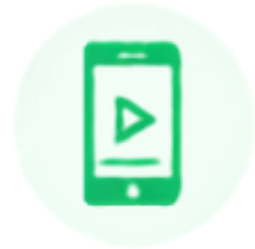

Our Solution

GetMoved verifies every customer before a lead is delivered. Through guided video inventory capture, AI validation, and human review, movers receive qualified opportunities instead of recycled inquiries.

Verified Data. Real Moves. Guaranteed Quality.

Video Inventory Verification

Customers submit guided video walkthrough so movers see exactly what needs to be moved before quoting.

AI-Powered

Our system detects incomplete inventories, inconsistencies, and low-quality submissions before they reach your team.

Verified requests

Receive leads that are verified, purchase-ready, and fully structured,

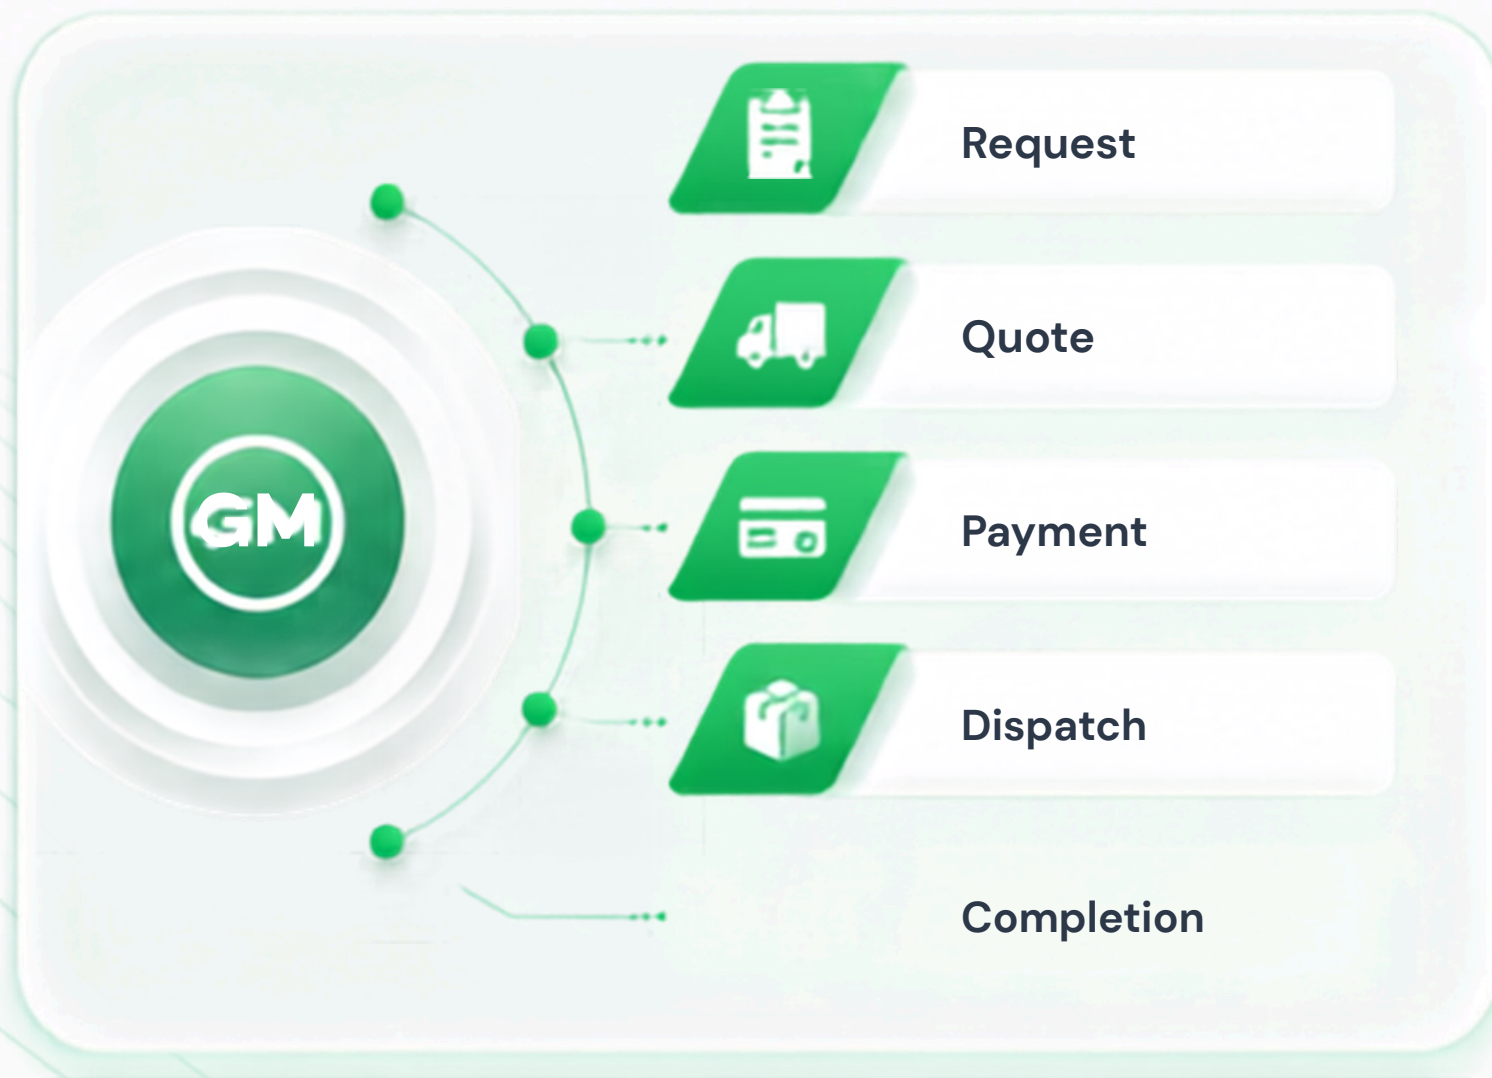

Performance-Based Protection

Movers only pay for qualified opportunities.

GETMOVED.APP

How GetMoved Works

GetMoved manages the complete moving workflow from customer intake to final mover payout.

1. Customer Creates Request

Customer enters move details and uploads inventory using AI video detection or manual selection.

2. Movers Receive & Submit Quotes

Qualified movers instantly receive the request, review inventory details, and submit pricing.

3. Customer Accepts & Pays

The customer selects a mover, completes payment, and activates the work order automatically.

4. Move Completion & Fund Release

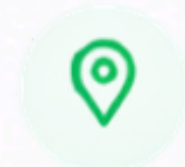

After the Bill of Lading is uploaded, the platform confirms completion and releases payment to the mover.

GETMOVED.APP

Customer Creates a Quote Request

Customers enter move details, scheduling, and destination information through a streamlined request flow.

Smart & Streamlined

Easy step-by-step flow to enter move details with confidence.

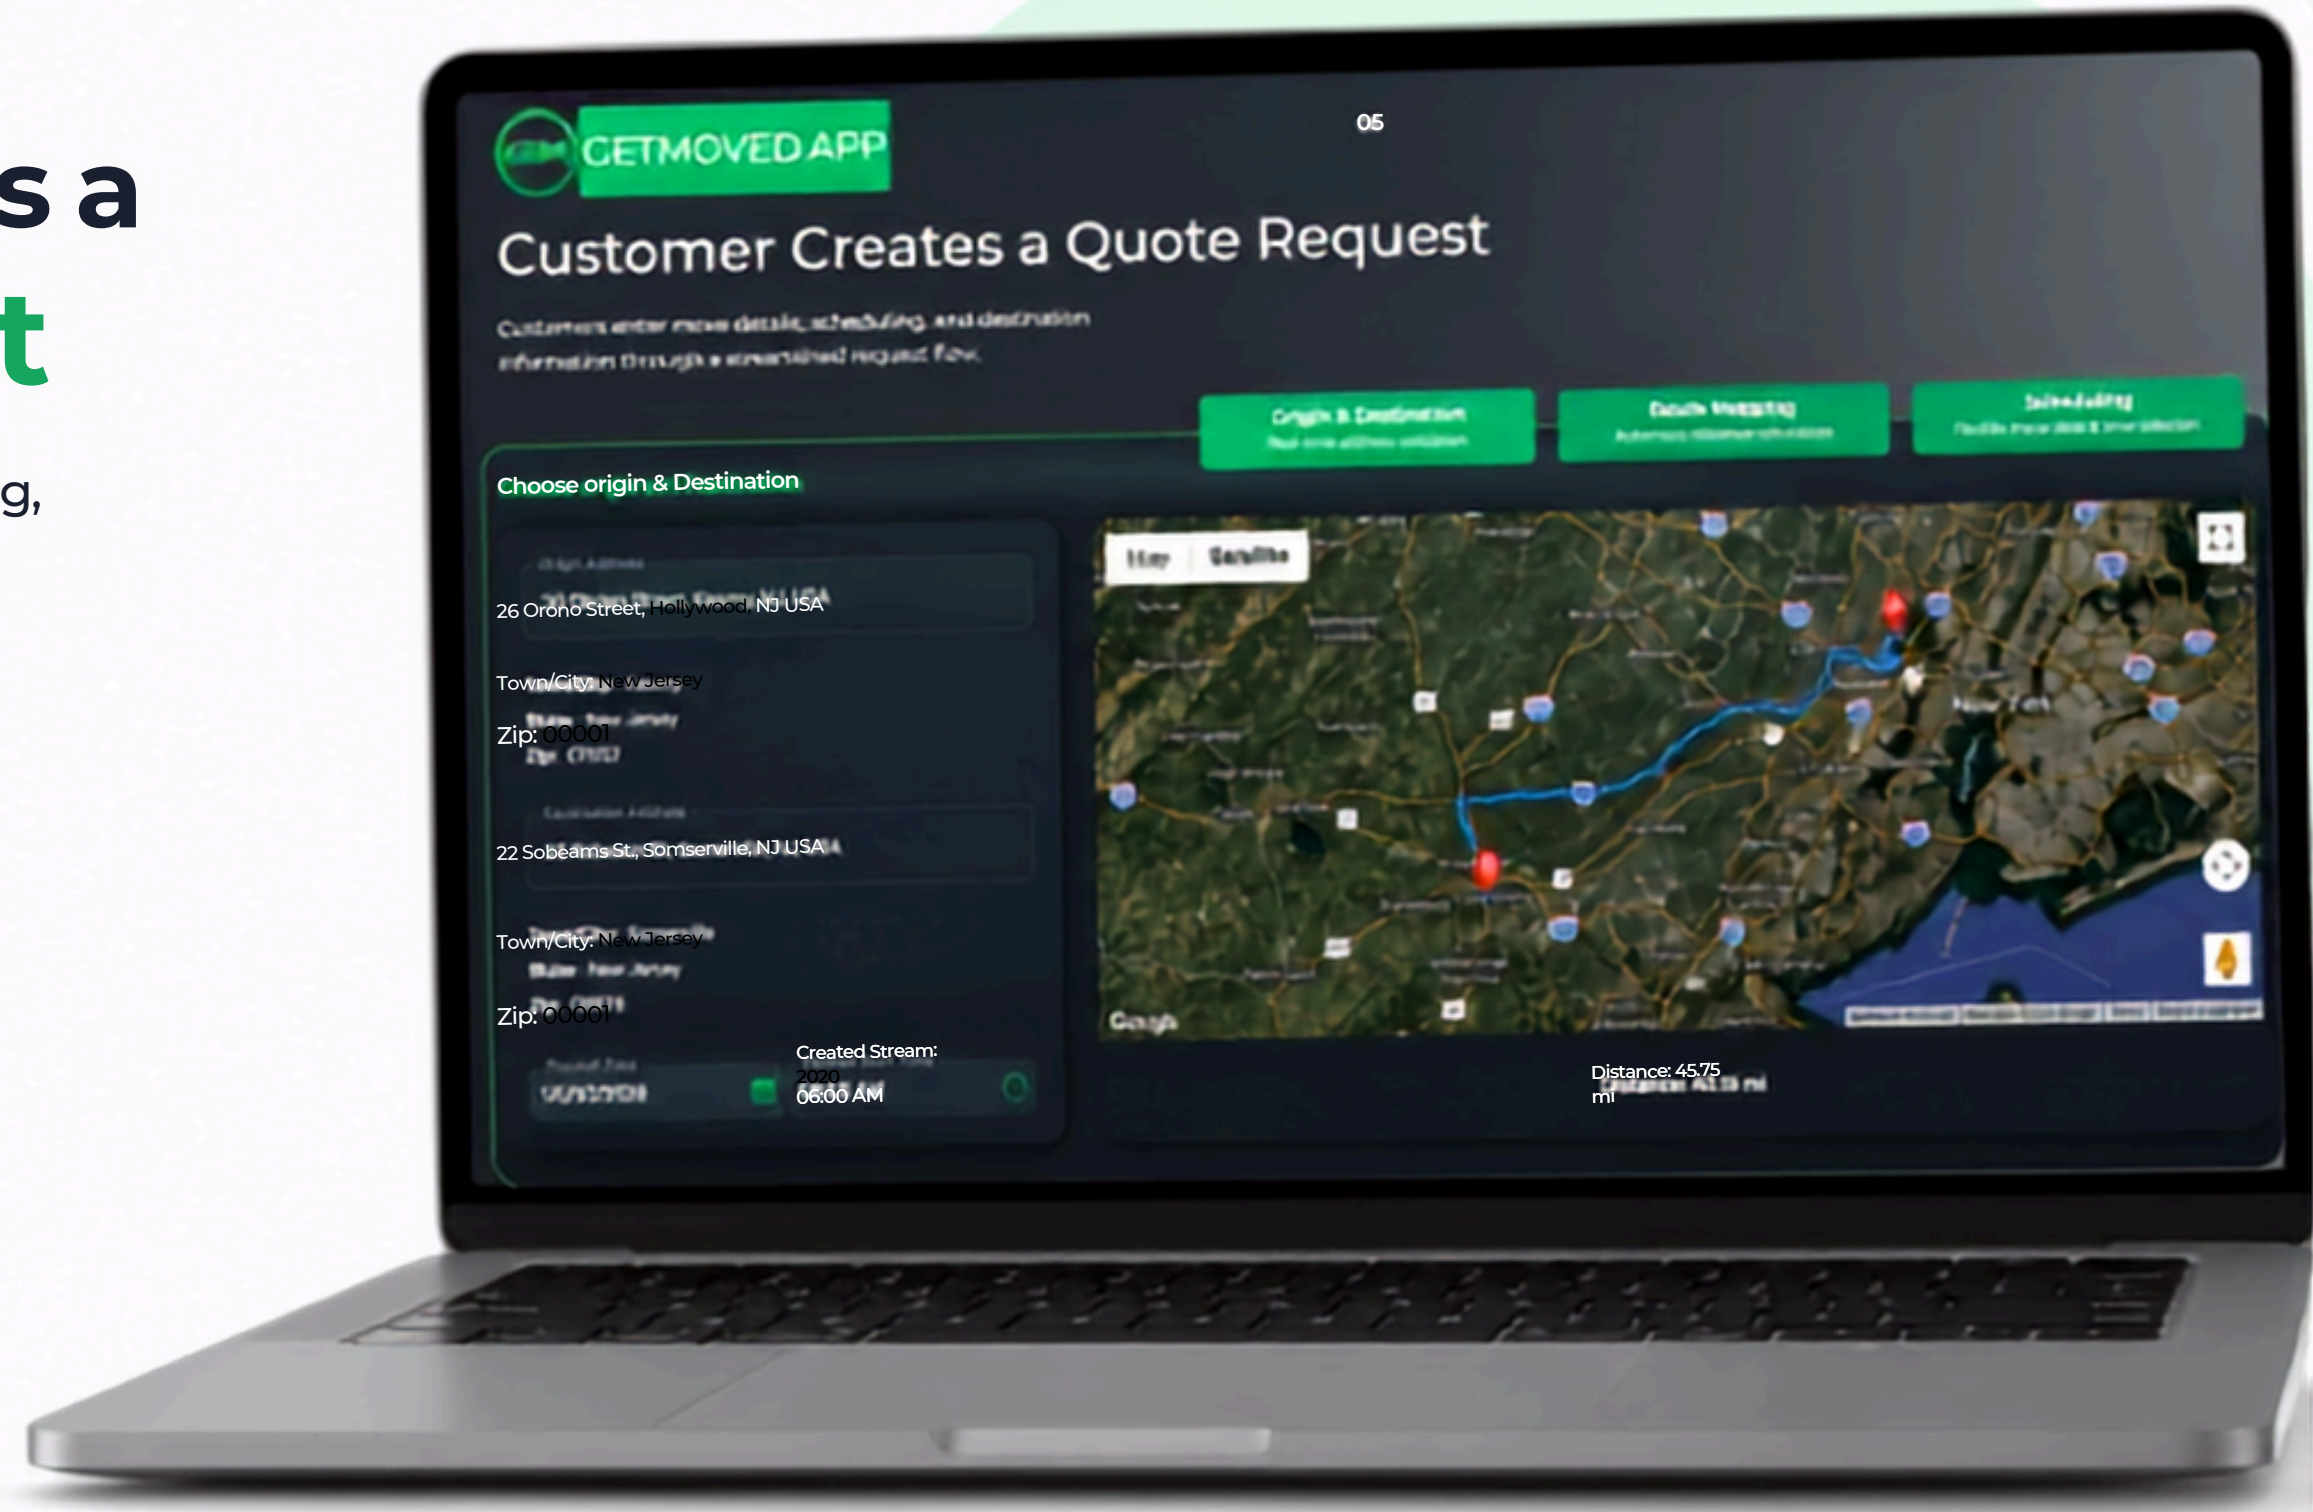

Accurate & Reliable

Real-time address validation and distance mapping for precision.
